# INTRODUCTION:

This is a standard wildland fire management position description intended for use in the Department of the Interior (DOI). The incumbent serves in a key fire management position in a field fire management organization as an Assistant Fire Management Officer (AFMO). This position is located in a unit with a high fire management program complexity level.

The AFMO assists the Fire Management Officer (FMO) in planning, developing, implementing, coordinating, and evaluating an integrated fire management program to achieve resource management objectives. Where aviation assets are utilized, the AFMO may also be responsible for the aviation management program. Maintains safety first as the foundation for all aspects of fire and aviation management.

Prior wildland firefighting experience on the fireline is a mandatory requirement.

This position requires a valid state driver's license.

This is a Testing Designated Position (TDP) under the Department of the Interior Drug-Free Workplace Program.

# **MAJOR DUTIES:**

In the absence of the immediate supervisor, the incumbent serves as the FMO.

# Program Management (20%)

The AFMO assists the Fire Management Officer (FMO) in directing a fire management program with a high complexity level. Analyzes current fire management plans and makes recommendations to meet changing conditions within the limits of current or anticipated funding.

Assists in coordinating and directing the application of standards, methods, and guidelines for all fire and aviation management program elements. Provides advice and guidance in the implementation of policies and standards received from higher authorities.

Works with the FMO in the development and implementation of fire prevention plans. Works with other agencies in the development and delivery of cooperative fire prevention programs and training.

Briefs decision makers. Coordinates plans of action with affected cooperators. Ensures information related to wildland fire, prescribed fire, and fire program components for internal and external audiences is accurate and timely.

Coordinates program activities with federal, state, tribal, and local government entities/agencies. Develops, implements and administers grants and agreements (e.g., Emergency Equipment Rental Agreements, mutual assistance, and Rural Fire Assistance).

Serves on various interagency committees, teams and work groups dealing with specific local, geographic, or national fire management issues.

Identifies research needs and applies new technology.

Assists in managing unit aviation programs or operations.

# Planning (20%)

Assists with fire and aviation management planning. Planning involves interacting with all disciplines as well as officials from other federal, state, tribal, and local agencies and the public. Plans include short-range issues as well as long-range strategies.

Reviews preparedness actions and operating plans used in the management of wildland fires. Negotiates cooperative agreements and resolves difficult and controversial public relations problems. Develops alternative wildland fire strategies by taking into consideration values to be protected and selects the appropriate alternative.

Reviews and evaluates fuels management and fire use plans and prescriptions to achieve specific ecosystem and resource management objectives. Identifies and evaluates the implications of the fuels management program on air quality standards, and provides operational guidance to mitigate potential impacts from smoke to sensitive areas.

Participates as a member of an interdisciplinary team in the development of land use plans.

# Operations (30%)

Coordinates and initiates fire management activities based on firefighter and public safety, cost effectiveness, and values to be protected consistent with resource objectives, by using the full range of strategic and tactical options otherwise known as Appropriate Management Response (AMR) as described in an approved Fire Management Plan (FMP).

Coordinates AMR on wildland fires. Initiates a Wildland Fire Implementation Plan (WFIP) for wildland fires and ensures a Wildland Fire Situation Analysis (WFSA) is completed and retained for fires that escape initial attack.

Coordinates operations with cooperating agencies on multi-jurisdictional wildland fires addressing risk to human safety and potential for damage to resources and improvements.

Monitors fire season severity predictions, fire behavior, and fire activity levels and takes appropriate actions to ensure safe, efficient and effective operations.

May serve as the unit aviation officer or subject matter expert.

Organizes, trains, equips, and directs a qualified work force to meet local, geographic area, or national level fire program management needs.

May serve as a Contracting Officer's Representative (COR) and may be responsible for the preparation of contract specifications and performance measures.

May manage national wildland fire support resources (e.g., Interagency Hotshot Crews, aviation assets, or other types of specialized modules).

# **Supervision and Safety (30%)**

Provides technical and administrative supervision to the unit(s). Plans and directs overall work to be accomplished by subordinate supervisor(s), sets and adjusts priorities, and prepares schedules for completion of work. Assigns work to subordinate supervisor(s) based on priorities, selective consideration of the difficulty and requirements of assignments, and the capabilities of the employees. Finds ways to improve production or increase the quality of work directed. Negotiates and coordinates work projects with other unit managers and supervisors.

Develops performance standards and evaluates work performance of subordinates. Advises, counsels, or instructs employees on both work and administrative matters.

Hears and resolves minor complaints from employees. Refers group grievances and more serious unresolved complaints to higher level supervisor or manager.

Effects minor disciplinary measures such as warnings and reprimands and recommends other action in more serious cases.

Selects subordinate supervisor(s) and other unit employees. Effects appointments, promotions, and reassignments.

Identifies and provides for routine training needs and makes decisions on special, controversial, or costly training for subordinate employees.

Manages the environmental and workplace hazards of the wildland fire environment and provides leadership and direction to subordinates in the recognition and mitigation of these hazards following applicable laws, policies, and guidelines. Personal accountability and zero tolerance for unsafe acts are paramount.

Responsible for the on-the-job safety and health of all employees supervised. Ensures that a comprehensive job hazard analysis is conducted and a risk management process is implemented. Responsibilities include identifying and correcting safety and health hazards, instructing employees on safety requirements, reviewing and reporting loss incidents, implementing corrective measures for violations of the Occupational Safety and Health Act standards, directing the periodic inspection of all workplaces, managing work/rest ratio and length of assignment guidelines, developing and executing a comprehensive physical fitness training program, debriefing with incident management team personnel, and coordinating safe travel plans.

#### **FACTORS:**

# 1. Knowledge Required by the Position

(Level 1-7, 1250 points)

Professional knowledge of natural resource management, fire ecology, fire behavior, and fire management theories, concepts, principles, and standards in a wildland fire environment.

Knowledge of the policies, techniques and practices of wildland firefighting obtained through substantial service as a primary firefighter of the Federal government or in a similar firefighting position outside the Federal government. This is a mandatory requirement of this position.

Fundamental knowledge of related fields of science (e.g., wildlife management, botany, hydrology, geology, archeology).

Comprehensive knowledge of the principles, practices, and concepts of wildland fire management (e.g., fire effects, fire hazard and risk analysis, fuel and flammability assessment, smoke management, incident management, prescribed fire, and fire use) sufficient to perform program development and oversight for the fire and aviation management programs.

Comprehensive knowledge of laws, regulations, and agency policies and procedures applicable to the use and protection of natural and cultural resources.

Knowledge of accepted wildland fire safety practices and procedures.

Comprehensive knowledge of the latest technological advances in fire management sufficient to evaluate their applicability to specific situations.

Knowledge of capabilities, limitations, approved safety standards, and operating procedures of commonly used fixed and rotary wing aircraft.

Knowledge of supervisory policies, procedures, and methods in order to manage a diverse workforce.

Knowledge of contracting procedures and ability to serve as a Contracting Officer's Representative (COR).

Ability to interact with individuals and special interest groups with diverse and potentially conflicting viewpoints regarding natural and cultural resource management priorities.

Skill in oral and written communication sufficient to prepare reports, present training, and coordinate work efforts.

# 2. Supervisory Controls

(Level 2-4, 450 points)

The FMO gives work assignments in the form of unit objectives, goals, and priorities. The FMO and the incumbent confer on the development of general objectives, projects, and deadlines.

In consultation with the FMO, accomplishes assignments within the constraints of Bureau policy and regulations. Has considerable latitude to independently plan and carry out assigned programs and responsibilities. Provides independent advice on technical questions and interpretations of policies and guidelines in the assigned areas of responsibility and is considered an authority in these subject areas. Keeps the supervisor informed of controversial issues and proposed compromises. Technical assistance, if required, is available.

Completed work is reviewed for compliance with the overall unit's objectives.

# 3. Guidelines

(Level 3-3, 275 points)

Guidelines include Department, Bureau, and multi-agency policies and procedures, regulations, plans, specialized fire information, and professional practices. Due to the high complexity level of the fire management program and the number of interdependent and cascading variables in fire programs, the guidelines can only be provided as models. This requires that the incumbent use considerable ingenuity and seasoned judgment to extend the guidelines or to develop new methods, techniques, or strategies specific to their zone of responsibility.

Fire planning is conducted in an interagency environment, with multiple stakeholders and cooperators. Since guidelines are issued at multiple levels by multiple organizations, conflicts must be resolved by the incumbent and the resolution incorporated into the appropriate plan.

# 4. Complexity

(Level 4-4, 225 points)

Primary responsibilities encompass multiple, intensely managed fire and aviation programs with varied and diverse objectives affecting the ecological relationships of landscapes in a unit with a high fire management program complexity level rating.

Contributors to the complexity include multiple, and sometimes conflicting, resource program objectives; checkered land ownership/management patterns; urban intermix; multiple agreements and cooperators; fluctuating weather patterns and conditions; varied types of landscapes; national, state, and local social and political factors; and budget, equipment, and personnel availability restraints.

Many contributing factors have multiple elements that change, some frequently, that require the incumbent to continually perform analysis of the effects of those changes on the managed programs, and extend, modify, or adapt current procedures to obtain the appropriate results. New and previously unknown aspects (e.g., social or political) require the incumbent to perform intensive analysis, recognize possible new directions or approaches, and develop original approaches and innovative techniques.

#### 5. Scope and Effect

(Level 5-3, 150 points)

The purpose of the work is to plan, develop, implement, coordinate, and evaluate an integrated fire management program to achieve resource management objectives.l

The fire management program is extremely important to the ecosystem and the incumbent's actions have an effect on the local economy, recreational pursuits, and public safety.

The results of the work influences the effectiveness in meeting the agency land management objectives and goals.

# 6. Personal Contacts

(Level 6-3, 60 points)

Personal contacts are made with personnel at all levels of cooperating land management and fire protection agencies at the federal, state, tribal, and local level. Primary contacts are with fire management personnel, resource specialists and other unit coordinators. Other personal contacts are with environmental and conservation groups, news media, contractors, private landowners, political officials, and the general public.

# 7. Purpose of Contacts

(Level 7-C, 120 points)

Most contacts are to exchange information, provide fire management advice, coordinate work efforts, negotiate solutions to common problems, and to plan and develop cooperative endeavors with federal, state, tribal, or local officials.

Sometimes the contacts are made to influence or persuade other subject matter experts to adopt a course of action or change program direction, resolve disputes, or to obtain compliance with objectives.

#### 8. Physical Demands

(Level 8-2, 20 points)

Normally the work is sedentary but often requires physical exertion while overseeing fire suppression activities including walking over rough, steep, uneven terrain in all types of weather. The incumbent is faced with emergency situations at all hours and must respond quickly. The position may require long shifts or multi-day assignments under primitive living conditions during emergencies. During the fire season, extended fire assignments away from the unit may be required under very stressful conditions.

# 9. Work Environment

(Level 9-2, 20 points)

Most work is performed in an office setting. Field work is sometimes performed in steep terrain where surfaces may be uneven, rocky, or covered with thick vegetation. Temperatures are frequently extreme, both from weather and fire conditions where the presence of smoke and/or dust conditions are frequently severe. The hazardous nature of fire suppression work requires that protective clothing (boots, hard hats, etc.) be worn during emergencies. The incumbent must exercise a variety of safety practices and precautions for their own and others' well being.

2570 points, GS-11 (2355 - 2750)
